OP20 TRUCK AND TRAILER VALVE

Features:

- ✓ High tensile cast iron construction.
- ✓ 11/16" UNO porting.
- ✓ Self contained variable relief valve.
- ✓ High flow spool standard.
- ✓ Corrosion resistant spools.
- ✓ High performance air activator.

Benefits:

- ✓ Custom built capabilities to suit various options.
- ✓ High flow spool creates fast cycle times and efficient tipping operation.
- ✓ UNO porting prevents distortion and leakage.
- ✓ High working pressures for power and performance.

Specifications:

- All valve bodies precision honed to the spools fitted.
- High quality close grain castings.
- Series parallel circuit.
- Maximum working pressure 20.68 MPa (3000 psi).
- Relief valve adjustment range 4.14" MPa-20.68 (600psi - 3000 psi).
